RESEARCH INTERESTS

In general: Actuarial Science, Data Science, Machine Learning, Applied Statistics

In particular: Life Insurance, Mortality Modelling, Non-Life Insurance, Reserving, Pricing

EDUCATION

PhD candidate in Insurance KU Leuven Supervisor: Katrien Antonio	2020 - Present
MSc in Actuarial and Financial Engineering - <i>Summa cum laude</i> KU Leuven	2019 - 2020
MSc in Mathematics - <i>Summa cum laude</i> KU Leuven	2017 - 2019
BSc in Mathematics - <i>Magna cum laude</i> KU Leuven	2014 - 2017

RESEARCH VISITS

University of Amsterdam Visiting scholar (<i>host: Torsten Kleinow</i>)	September 2023
-------------------------------------------------------------------------------------	----------------

PUBLICATIONS

WORK IN PROGRESS

Relation Between Mortality Statistics and Climate and Environmental Factors at a Regional Level
with Katrien Antonio and Torsten Kleinow

The impact of environmental and climate-related factors on mortality rates has been a subject of significant interest in the literature. This research focuses on weekly death counts in European regions (NUTS 3). We use the Serfling mortality model as a baseline model to explain mortality deviations from this baseline model using climate factors such as temperature, humidity, wind speed, and rainfall and environmental factors such as air pollutants PM10, PM2.5, O3, and NO2. We do this using an extreme gradient boosting machine. We extract the climate factors from the gridded observational data set EOBS and the environmental factors from the Copernicus Atmosphere Monitoring Service's (CAMS) gridded database. By leveraging this approach, we aim to discern the crucial factors influencing excess mortality and unravel potential interaction effects among these factors.

CONFERENCES & SEMINARS

- 2024 KU Leuven, Bayes, and UvA PhD Workshop (Leuven)
- 2023 Modelling and Societal Impact of Longevity and Ageing Conference (Amsterdam), 26th International Congress on Insurance: Mathematics and Economics (Edinburgh), RCLR seminar (Amsterdam), Doctoral Seminar (Leuven)
- 2022 Insurance Data Science Conference (Milan), European Actuarial Journal Conference (Tartu), Doctoral Seminar (Leuven)
- 2021 24th International Congress on Insurance: Mathematics and Economics (online)

TEACHING

Thesis supervisor of master students in the Master of Actuarial and Financial Engineering since 2020

Teaching assistant for the course “Loss Models” since 2020: responsible for giving the exercise sessions and constructing/correcting three assignments

AWARDS

AFI Master Thesis Award (2020)

REFeree

Annals of Actuarial Science

SKILLS

Software: R, \LaTeX , Python

Language: Dutch (native), English (fluent), French (basic)

BIO

Birth: September 7, 1996

Citizenship: Belgian

Hobbies: Running, Hiking
